LANGUAGES

Bambara (Native)**French** (Fluent)**English** (Fluent)**Arabic** (Intermediate)**Japanese** (Basic)

PROFILE

Product-oriented full-stack developer building web and mobile applications, e-commerce systems, and AI-assisted automation workflows.

I work across frontend, backend, mobile, APIs, and integrations, with a focus on practical software that solves real business and operational problems.

I have contributed to marketplace, fintech, civic tech, and applied AI products, including an AI-powered e-commerce pipeline for product image processing, QA, and draft publishing workflows.

EXPERIENCE

Web/Mobile Developer — Fidelity

Remote

February 2024 - January 2026

- Built and improved marketplace features across web and mobile, including product browsing, ordering flows, seller/customer journeys, and admin-facing workflows.
- Contributed to e-commerce automation workflows, including product image processing, catalog preparation, AI-assisted QA, and draft validation.
- Worked across frontend, backend, and mobile layers to improve usability, operational flow, and product reliability.

Fullstack Web Developer — Geotrac

Bamako, Mali

June 2023 - Sept. 2023

- Redesigned the GeoTrac website and improved the user experience, structure, and presentation of the service.
- Built a web/mobile reporting platform for lost-item declarations, search, and owner matching workflows.

Junior Web Developer — Aplika

Bamako, Mali

March 2022 - Nov. 2022

- Improved showcase and e-commerce websites for client projects, focusing on cleaner UI, better structure, and maintainable frontend implementation.

SELECTED PROJECTS

GeoTrac Platform

Lost-and-found platform in Mali with posting and owner matching.

Kora

Cross-border payments and transfers between Africa and the world.

Fidelity Market - Web & Mobile

Marketplace connecting sellers and customers with an optimized buying journey.

AI Product Image Automation Pipeline

Automated e-commerce workflow for product image processing, variant grouping, AI-assisted QA, rejection tracking, watermarking, and draft preparation.

Python • FastAPI • Google Drive API • Gemini API • Pillow
