EXPERIENCE

Mobile Application Developer — BarberChat

Aug 2026 – Present

Full-time · On-site · Casablanca-Settat, Morocco

- Build and enhance Flutter UI components to pixel-perfect design specifications, delivering consistent user experience across iOS and Android.
- Collaborate with the backend team to define REST API contracts and integrate endpoints into the Flutter frontend, maintaining reliable JSON data flow across the app.
- Refactored and reorganised the mobile codebase to improve architecture, readability and long-term maintainability.
- Manage Android production release builds and handle iOS beta deployments through TestFlight for each feature rollout.

Co-founder & Founding Full-Stack Engineer — Daskari

Oct 2025 – Present

Part-time · Remote

- Built the Flutter mobile app (iOS/Android): KYC onboarding, wallet flows, FCM push notifications and secure token storage.
- Designed and built the Spring Boot backend: REST APIs, MySQL schema, SSE for real-time admin updates and backend notification handling.
- Integrated PayDunya for local payment processing and contributed to the integration of Solana/USDT-based cross-border transfer flows.
- Built React admin dashboard for transaction monitoring, user management and content approval; supporting Next.js landing page.
- Managed Google Cloud Storage for document handling; progressed deployment through TestFlight and Google Play review.

Web/Mobile Developer — Fidelity

Feb 2024 – Apr 2026

Remote

- Led end-to-end marketplace redesign across desktop, tablet and mobile (Angular, Spring Boot, Flutter): improved product discovery, introduced app-like mobile navigation and expanded workflows across customer, seller, product, order and admin surfaces.
- Reworked product search from server-dependent exact-match queries toward near-instant client-side matching using cached product data, similarity matching and synonym mapping.
- Built and integrated an AI-assisted e-commerce image and publishing workflow (Python/FastAPI, Gemini API, Google Drive APIs): product-variant grouping, AI image QA, rejection tracking, human approval and draft-product creation.

Fullstack Web Developer — Geotrac

Jun 2023 – Sept 2023

Bamako, Mali

- Redesigned the GeoTrac website and improved UX, structure and service presentation.
- Built a web/mobile platform for lost-item reporting, search and owner-matching workflows (Angular, Spring Boot, MySQL).

Junior Web Developer — Aplika

Mar 2022 – Nov 2022

Bamako, Mali

- Improved client showcase and e-commerce websites: frontend implementation, responsive UI and site structure.

EDUCATION

Professional University Degree (Licence Professionnelle) in Web Application Development and Mobile Technologies

École Supérieure de Technologie de Casablanca, Université Hassan II · Mention: Assez Bien
