EXPERIENCE

Mobile Application Developer — BarberChat

Aug 2026 – Present

Full-time · On-site · Casablanca-Settat, Morocco

- Collaborated with the backend team to define REST API contracts and integrated endpoints into the Flutter mobile frontend.
- Consumed and validated JSON payloads from backend REST APIs; tested data flow and debugged integration issues across Android and iOS.

Co-founder & Founding Full-Stack Engineer — Daskari

Oct 2025 – Present

Part-time · Remote

- Designed the Spring Boot backend for a cross-border fintech product: REST API architecture, MySQL schema design and service/repository layer structure.
- Implemented SSE (Server-Sent Events) for real-time streaming of transaction and notification events to the React admin dashboard.
- Integrated PayDunya payment gateway for local mobile money and card processing; contributed to the integration of Solana/USDT-based cross-border transfer flows.
- Built KYC verification workflow: document collection endpoints, status state machine and admin review/approval logic.
- Implemented asynchronous backend processing and notification handling for payment events and user lifecycle triggers.
- Set up Google Cloud Storage for secure document storage; configured Docker-based service deployment.
- Progressed through TestFlight (iOS) and Google Play (Android) review cycles.

Web/Mobile Developer — Fidelity

Feb 2024 – Apr 2026

Remote

- Built and improved Spring Boot backend features supporting customer, seller, product, order and admin workflows in a multi-platform e-commerce marketplace.
- Rearchitected product search from server-side exact-match to client-side matching using cached product data, similarity scoring and synonym mapping, reducing search latency.
- Built and integrated an AI-assisted e-commerce image pipeline (Python/FastAPI, Gemini API, Google Drive APIs): product-variant grouping, AI image QA, rejection tracking, human approval and draft-product creation.
- Integrated Spring Boot APIs with Angular web and Flutter mobile clients, working across API contracts, data models and cross-platform feature delivery.

Fullstack Web Developer — Geotrac

Jun 2023 – Sept 2023

Bamako, Mali

- Built Spring Boot backend for lost-item reporting platform: REST APIs, MySQL schema and owner-matching query logic.
- Delivered Angular frontend consuming backend APIs; redesigned and improved the GeoTrac website.

EDUCATION

Professional University Degree (Licence Professionnelle) in Web Application Development and Mobile Technologies

École Supérieure de Technologie de Casablanca, Université Hassan II · Mention: Assez Bien

SKILLS

Backend: Java, Spring Boot, REST APIs, MySQL, Docker

Cloud & Integration: Google Cloud Storage, Firebase/FCM, SSE, PayDunya API, Google Drive API

Automation: Python, FastAPI, Gemini API

Mobile: Flutter, Dart (full-stack context)

Frontend: TypeScript, Angular, React, JavaScript

Additional: PHP, Laravel

LANGUAGES

Bambara (Native) · French (Fluent) · English (Professional working proficiency) · Arabic (Intermediate)
