EXPERIENCE

Mobile Application Developer — BarberChat

Aug 2026 – Present

Full-time · On-site · Casablanca-Settat, Morocco

- Build and enhance Flutter UI components to pixel-perfect design specifications, delivering consistent mobile UX across iOS and Android.
- Collaborate with the backend team to define REST API contracts and integrate endpoints into the Flutter frontend, ensuring reliable JSON data flow.
- Refactored and reorganised the Flutter codebase to improve architecture, maintainability and code readability.
- Manage Android production release builds for new feature rollouts and handle iOS beta deployments through TestFlight.
- Test and debug features across Android and iOS platforms, ensuring cross-platform reliability before each release.

Co-founder & Founding Full-Stack Engineer — Daskari

Oct 2025 – Present

Part-time · Remote

- Architected and built the Flutter mobile app (iOS/Android) for a cross-border fintech product: wallet UI, real-time transaction flows and balance management.
- Implemented multi-step KYC onboarding: document capture, camera integration, status polling and feedback UX.
- State management with flutter_riverpod; HTTP layer with Dio; secure credential and token handling with flutter_secure_storage.
- Integrated Firebase Cloud Messaging for push notifications and Crashlytics for production crash monitoring.
- Led iOS and Android release cycles: TestFlight internal testing and Google Play review.
- Integrated the Flutter app with Spring Boot REST APIs and Firebase Cloud Messaging for transactional and account notifications.

Web/Mobile Developer — Fidelity

Feb 2024 – Apr 2026

Remote

- Led Flutter mobile development for a multi-platform marketplace: redesigned navigation toward app-like UX, improving product discovery, browsing and ordering journeys on iOS and Android.
- Built Flutter features across product browsing, ordering and other customer-facing marketplace workflows.
- Reworked mobile product search toward client-side matching using cached product data, similarity scoring and synonym mapping.
- Worked across Flutter, Angular and Spring Boot to maintain consistent workflows and API integration across platforms.

Fullstack Web Developer — Geotrac

Jun 2023 – Sept 2023

Bamako, Mali

- Built web/mobile platform for lost-item reporting and owner matching; delivered responsive, mobile-friendly Angular UI.
- Redesigned the GeoTrac website and improved structure, navigation and service presentation.

Junior Web Developer — Aplika

Mar 2022 – Nov 2022

Bamako, Mali

- Improved client showcase and e-commerce websites: frontend implementation, responsive UI and site structure.
